INTERDISCIPLINARY TEAM

“Care is best delivered through multiD clinics”

Example team members:
- Physician
- RN/NP
- PT, OT, SLP
- Social Worker
- Dietitian
- Genetic counselor
- Psychology
CHALLENGES

- Coordination and transition of care across disciplines
- Patient and family members’ expectations
- Lack of support for evidence-based care
- Poor definition of roles within clinic
- Balancing perception of “active care” with “palliative”
- Follow-ups every 2-3mo
- Transportation
- Limited availability of clinics
