

UNLOCKING THE SECRETS OF BRAIN DISEASE®

Areas of Research Focus for 2019-20

CurePSP offers grants of up to \$100,000 to academic and nonacademic scientists and clinicians for projects relating to progressive supranuclear palsy and corticobasal degeneration. Preference will be given to proposals from early-career investigators and to lines of inquiry likely to attract future funding from larger agencies. CurePSP has identified 16 scientific areas of particular current interest. These and the application form and instructions are at www.psp.org/iwanttolearn/grants/. CurePSP's Vice President of Scientific Affairs, Kristophe Diaz (diaz@curepsp.org) can answer questions and must be contacted directly before any application will be considered. The next deadline is **December 1st, 2020**.

CurePSP Venture Grants Program

Suggested topics for investigator-initiated grant applications

- autophagy/proteostasis
- cell replacement therapy/regenerative approaches
- diagnostic markers in very early stage disease
- environmental causes and geographical clusters
- epigenetics
- GSK3 β and other kinases/phosphorylases
- inflammation
- Mendelian families
- nucleochromatin
- rehabilitation strategies for motor and non-motor deficits
- RNA-based neuroprotection
- single cell sequencing
- sleep physiology
- symptomatic drug trials
- synaptic dysfunction/loss
- tau strains
