

UNLOCKING THE SECRETS OF BRAIN DISEASE®

Areas of Research Focus for 2022-23

CurePSP offers grants of up to \$100,000 to academic and nonacademic scientists and clinicians for projects relating to progressive supranuclear palsy and corticobasal degeneration. Preference will be given to proposals from early-career investigators and to lines of inquiry likely to attract future funding from larger agencies. CurePSP has identified scientific areas of particular interest.

These and the application form and instructions are at www.psp.org/iwanttolearn/grants/. CurePSP's Executive Director and Chief Science Officer, Kristophe Diaz (diaz@curepsp.org) can answer questions and must be contacted directly before any application will be considered. The next deadline is **April 22nd, 2022**.

CurePSP Venture Grants Program

Suggested topics for investigator-initiated grant applications

- Epigenetics and Epigenomics
- Post-translational modifications of tau
- RNA-based neuroprotection
- Single cell sequencing
- Tau strains
- Autophagy/proteostasis
- Inflammation, including microglia
- Innate and adaptive immunity
- Synaptic dysfunction/loss
- Synaptic pruning
- Diagnostic markers in very early-stage
- Environmental/toxic causes
- Rehabilitation strategies for motor and non-motor deficits
- Sleep physiology
- Symptomatic drug trials
