

The CurePSP Centers of Care network was formed in 2018 with the goal of connecting people diagnosed with progressive supranuclear palsy (PSP), corticobasal degeneration (CBD) and multiple system atrophy (MSA), and related neurodegenerative diseases, to the best possible clinical care to support their disease management and quality of life. Medical centers have been designated a CurePSP Center of Care through eligibility criteria centered around leadership in specialized therapies and treatment options, comprehensive support services and clinical research dedicated to PSP, CBD and MSA. There are 26 CurePSP Centers of Care in the United States and 2 in Canada. CurePSP aims to expand this foundational care network in the coming years.
